PROJECTS:

- **Skill-Sprint**   **2024: Present**

- Developed "Skill Sprint," a web-based application using the MERN stack (MongoDB, Express.js, React.js, Node.js) to enhance the student placement process at our university. The platform aggregates ranks from coding websites like LeetCode and HackerRank, providing valuable insights into student placement process. This enables placement administrators to make informed decisions, streamline the placement process, and improve overall efficiency.
